Bird Weighing System

- Receive accurate bird weights in real time, at all times

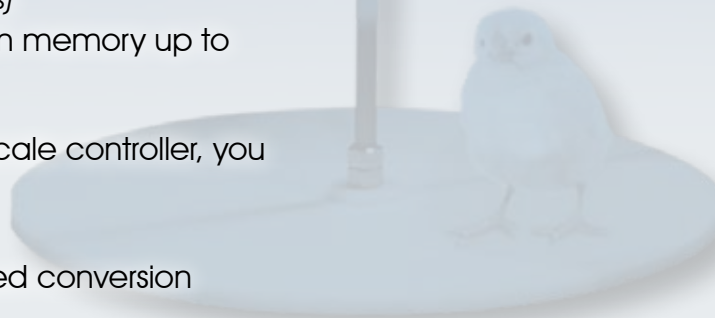

Advantages

- Provides early warning on bird health issues
 - Reduced medication costs
 - Reduced mortality
- Better than manual weighing
 - Avoid stress on birds
 - Shows daily weighing
 - Platform designed to encourage birds to hop onto the scale
 - Reduces labor
- Provides vital management information for improvements in bird performance
- Provides shipping weight control. Allows you to adjust lighting and feeding well in advance to maintain target weights

Features

- Easy and fast access to daily or cumulative flock information
 - Average weight, daily gain
 - Daily weighings are categorized into seven different weight groups
 - Standard weight deviation
 - Uniformity bandwidth
 - Up to 4 scales can be connected to one controller (*Breeder scales and/or suspended scale platforms*)
 - Monitor each bird scale independently (*Average of multiple scales*)
 - Keeps flock information in memory up to 125 days
- When used with the feed scale controller, you also get:
 - Daily feed intake
 - Daily and cumulative feed conversion

Bird Scale

Live remote access to your controller and data history so you can make informed decisions 24/7.

Accuracy
